

Take your talent to the next level.

John Deere TECH is not your typical diesel program. Of course there's the classroom time where you'll learn the basic theories behind John Deere systems. And you'll have a lot of time in the lab, working with real John Deere equipment. Then you'll apply all that you've learned to the real world as a paid intern for a John Deere dealership. The insight and experience you'll gain during your internship will allow you to take your talent to the next level.

Nothing prepares you for tomorrow like training with John Deere TECH.

The training is intense and focused. You'll learn about John Deere diesel engines, powertrains, hydraulics, and machine set-up systems. You'll learn about high-tech electronics, computer diagnostics, and proprietary John Deere software. But you'll also learn the communication and customer relations skills that are essential for your success.

No two days are alike for a John Deere TECH graduate. You'll face new challenges every day, and you'll be ready for them. You'll solve problems, helping both colleagues and customers. This is a career decision and a life decision.

John Deere is a Fortune 100 company, the world's leading producer of agricultural equipment, and a major manufacturer of industrial and consumer equipment.

YOUR FUTURE STARTS HERE

Turn who you are and what you love to do into a career.

Since you were a kid, you could fine tune an engine and break down a transmission faster than most people can set up their cell phone. So isn't it time to think about your next step? Enroll in the John Deere TECH program and turn those skills into a career as a certified service technician. You'll graduate with confidence and credentials, and you'll be as comfortable working with customers and computers as you are with a torque wrench.

It's hard to find opportunity and security like the John Deere TECH program offers. The program is a two-year associate's degree and is the only program that offers the advanced training valued by more than 1,500 John Deere dealerships across North America.

If you're ready to be one of the best, John Deere TECH is ready for you

Your next steps:

- Get a high school diploma or equivalent
- Register for and meet all college entrance requirements
- Find a John Deere dealership to sponsor you
- Take all required courses, including laboratory work
- Maintain the required GPA

Run with the leader.

John Deere TECH is challenging and requires commitment. But if cutting-edge technology, computers, and John Deere equipment excite you, John Deere TECH may be the career training you've been waiting for. If you're ready to be the best, then John Deere TECH is ready for you.

The John Deere TECH program is an educational experience that will help you put your career in gear, and keep it moving.

The John Deere TECH program is available at 21 locations.
