A. RESOLUTION 2024 - 28: CONSIDERATION OF ANNUAL CAMP GRANT LAPTOP PURCHASE

BACKGROUND: The Tri-State College Assistance Migrant Program (CAMP) annually purchases a large number of laptop computers along with packaged hardware support for each to meet the needs of qualifying students as they progress though the program. This process addresses the need for providing the students additional experience with technology and using it to support their educational endeavors.

Each student will be provided a laptop for school use, for a total of 28 computers for the next fiscal year. Tutors can assist the student with basic computer and internet skills. Internet and email will be available. If the student maintains a 3.0 GPA while in CAMP, the computer will be awarded to the student at the completion of the program. The CAMP program will utilize grant funding to facilitate this purchase.

B. RESOLUTION 2024 - 29: CONSIDERATION OF KASB WORKER'S COMPENSATION MEMBER PARTICIPATION PREMIUM AGREEMENT

BACKGROUND: Administration has received the renewal rates for the 2024-25 workers compensation premium. For several years, FSCC has belonged to the Kansas Association of School Board Workers Compensation Fund, which is a consortium of educational institutions pooling together to reduce the individual institution's risk associated with workers compensation. Worker's compensation rates are pre-determined by the State of Kansas and each employer is assessed a "mod factor" to determine annual premium from these rates. The mod factor is determined by the previous three years usage and claims made by each employer. A mod factor of 1.00 or less is desirable, and a mod factor greater than 1.00 results in the state determined rates increasing proportionately. The mod factor used to determine the 24-25 premium has dropped from 1.18 to 1.12. The annual mod factor and state determined rates can cause significant swings in premium cost from year to year.

YEAR	AMOUNT	MOD FACTOR
24/25	\$37,244	1.12
23/24	\$41,910	1.18
22/23	\$61,039	1.20
21/22	\$31,887	0.93
20/21	\$30,522	0.93
19/20	\$29,671	0.90
18/19	\$25,349	0.89
17/18	\$29,895	0.90
16/17	\$33,108	0.95
15/16	\$89,925	1.65
14/15	\$127,789	2.10
13/14	\$114,167	1.98
12/13	\$80,645	1.33

KASB Worker's Compensation Fund is offering an opportunity to renew participation in their Loyalty Credit Program. FSCC has participated in this program since its inception in 2021. The Program is intended to share the fiscal success and stability of the pool with its members. Because of a highly competitive marketplace, work comp rates have been declining for several consecutive years while work comp carrier options are increasing. This program allows the pool to share in the fiscal strength of the KASB pool and create membership stability at the same time. Program participants agree to a three-year coverage period and receive premium discounts of 10% in the first year, 5% in the second, and 3% in the third resulting in member savings and Fund stability. If approved, participation in this program would reduce the 24-25 premium from \$37,244 to \$33,520.

RECOMMENDATION: It is recommended the Board approve both the KASB Worker's Compensation Fund Membership Participation Agreement as well as the Loyalty Credit Program.

KASB

Loyalty Credit Program

Workers Compensation Fund, Inc.

Initiated in 1987, our Workers Compensation Fund is the longest continuous program built by schools and for schools providing Workers Compensation Insurance in the state of Kansas. One-hundred and thirteen (119) Educational Groups currently belong to the Fund.

WHY Belong To A Pool?

Employers are faced with purchasing insurance in two ways –

- I. Obtain coverage in the traditional "for-profit" retail environment where you receive bids from insurance carriers for this type of coverage. They administer your insurance program as well as act as your claim's administrator.
- 2. Pool membership provides coverage through a pooled fund that is typically "owned and governed" by its members. Allowing members to participate in the growth and success of the pool by not transferring underwriting profit to retail insurance, but rather, keeping those dollars within the pool and returning them in the form of dividends or rate reductions.

Membership is the difference between owning or renting your insurance coverage.

WHY a Loyalty Credit Program?

A Loyalty Credit Program is established to share the fiscal success and stability of the pool with its members. Because of a highly competitive marketplace, work comp rates have been declining for several consecutive years while work comp carrier options are increasing. KASB Workers Compensation Fund is proud of both our member stability and fiscal strength. This new program allows the pool to share in that fiscal strength and create some membership stability at the same time. Giving our members

Annual Premium with Loyalty Program

\$32,369

Annual Premium without Loyalty Program

\$35,966

That's a difference of \$3,597.

immediate premium reductions during participation in the program keeps more dollars pointed to the classroom and student success. The three-year program will provide a premium discount of 10% in the first year, 5% in the second, and 3% in the third resulting in member savings and Fund stability.

WHY should you participate?

- As a member of the KASB Workers Compensation Fund, this program allows you to share in the fiscal success of the pool over the next three program years.
- Immediately reduces your premium, keeping precious resources local to support students and student success.
- Retains stability for your administration team and creates longer relationships with your Workers Compensation administrative and claims teams.

Description of Work

We propose to furnish and install the labor, materials, tools and supervision to perform the following work on one (1) Passenger Elevator, Fort Scott Community College, 2108 S. Horton St., Fort Scott, KS 66701.

A. We will furnish and install a complete new hydraulic power unit (tank, valve, pump and pump motor). The motor and pump will be submersed under the oil inside the tank "wet system" in order to provide for sound isolation. A muffler, designed to reduce pulsation and noise, which may be present in the flow of hydraulic oil, will be provided in the oil line at the top of the pump.

Control valves, including a safety check valve, an up direction valve with high pressure relief including up leveling and soft stop features and a lowering valve including down leveling and manual leveling feature, will be mounted in a compact unit assembly (tank).

A shut off valve, designed to shut off the flow of oil between the cylinder and the Power Unit, will be provided in the oil line in the machine room. Automatic two-way leveling will be provided to automatically stop and maintain the car approximately level with the landing, regardless of change in load.

New hydraulic oil shall be provided. The old hydraulic oil shall be pumped into large barrels, removed from facility and properly recycled.

Benefits:

- Improves ride quality and smoother starts & stops throughout the ride
- Improves passenger and tenant satisfaction by reducing noise pollution and vibration
- Improves reliability and availability reduces service interruptions
- Reduces operating expenses for service requests not covered under your agreement
- Improves parts availability for power units which are obsolete and parts that are not readily available
- Improves leveling minimizes the risk of tripping hazards which improves safety and reduces claims risk

Comprised of four major components – the tank, valve, pump and pump motor – which operate together to control the oil flow required to move and stop the elevator. Improper operation by any of the components in the power unit can result in more shutdowns, safety tripping hazards, entrapments, slower performance, uncomfortable start/stop & ride and more

Proactive Replacement

- Avoids unplanned disruption
- Minimizes disruption, as your elevator is operational while components are shipped. Downtime becomes just days for the upgrade, rather than weeks for the component leadtimes
- Improves tenant experience by allowing you to schedule this at the best time and provide advance notice

Complete Replacement

- Upgrading the entire power unit at once is more cost effective and efficient than upgrading the components individually
- Power units come packaged as a unit which are 'born' together.
 Upgrading individual components and introducing new components with older components may cause problems
